Professional Experience:

Personalized AGI Society | Founder, Chairman of the Board | 2023.03.28 -
- Making personal AGI available to everyone.

ForUS.AI | Founder, NLP Engineer | 2020.04.01 - 2022.02.15
- Implemented a service that creates content (lyrics) matching user psychology (MBTI) by organizing a team of 20 people.

Leadership and Teamwork Experience:

LiOn Public Project Contributor | [GitHub]
- Worked on the LiOn project, which aims to connect various data sources to expand expertise in natural language processing.
- Collaborated with team members to develop and refine algorithms and techniques for improved language understanding.

KoAlpaca.cpp Collaborator | [GitHub]
- Contributed to the development of KoAlpaca, a locally run Instruction-Tuned Chat-Style LLM in C++.

GPT.asm Project Creator | [GitHub]
- Developed an assembly language example for GPT (Generative Pre-trained Transformer) models.

DistilKoBiLSTM Project Contributor | [GitHub]
- Developed DistilKoBiLSTM to extract task-specific knowledge from teacher models and convert them to BiLSTM.

KoGPT2-FineTuning Project Leader | [GitHub]
- Coordinated the development and fine-tuning of KoGPT-2, a Korean language model, for various applications, including learning Korean lyrics data.
